

LG MOUNTAIN

WINTER BARLEY

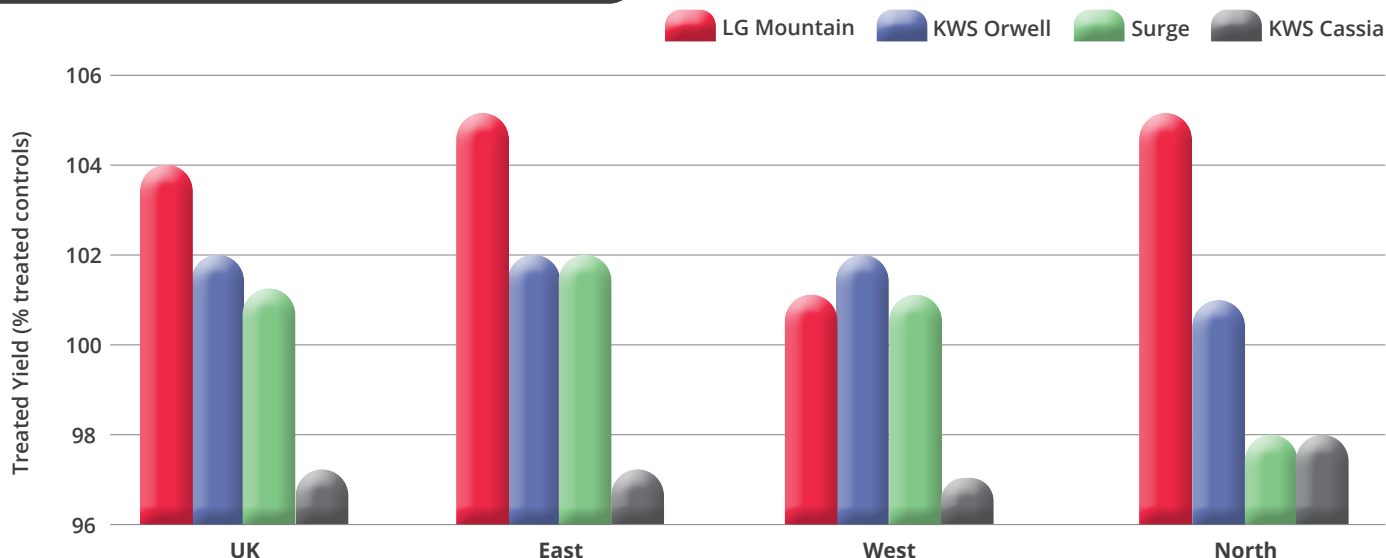

Pedigree: Harlequin x KWS Glacier

Breeder's Reference: LGBU14 6669

Trial Status 2020/21: UK Recommendation

LG Mountain is one of the highest yielding 2-row winter feed barley varieties available. The variety performs consistently across all regions, combined with good agronomic characteristics of short straw, great disease resistance and good grain quality.

UK YIELD POTENTIAL:

LG Mountain offers a significant step forward in yield for 2-row barley varieties, over other commercial varieties on the AHDB RL 2020/21.

LG Mountain has consistently shown very high yield potential over seasons and regions, in both treated and untreated trials.

AGRONOMIC CHARACTERISTICS:

	LG MOUNTAIN	KWS Orwell	Surge	KWS Cassia
Resistance to lodging	7	8	7	7
Straw height without PGR (cm)	85	86	86	91
Straw height with PGR (cm)	84	84	84	88
Ripening (+/-KWS Orwell -ve = earlier)	-1	0	-1	0
Mildew	5	3	6	4
Brown Rust	7	7	8	7
<i>Rhynchosporium</i>	5	6	7	5
Net Blotch	6	5	6	6
Grain Quality:				
Specific Weight (kg/hl)	69.1	67.9	69.3	71.2

LG Mountain is a short strawed variety, showing good lodging resistance with standard PGR applications.

LG Mountain is earlier maturing at -1.

LG Mountain has a good all-round disease profile, including BaYMV resistance.

LG Mountain has good grain quality attributes with a very good specific weight; an important feature in a 2-row winter barley.

March 2020. Data from the AHDB Recommended List 2020/21. On the 1-9 scales, high figures indicate that a variety shows the character to a high degree.
